

1) Web Development Internship

OFFICE: Gloify - Bengaluru, Karnataka

₹10,000 a month

About the company:

Gloify is a product-based company that creates technological solutions for diverse industries. We have been dedicated to creating simple products that solve complex business needs. Our product suite comprises enterprise-level as well as small-medium business market solutions. From the discovery to post-deployment support, we deal with all the phases of business deployment to ensure that we help our associates rise.

About the internship/job:

We are looking for a Python web developer responsible for managing the interchange of data between the server and the users. Your primary focus will be the development of all server-side logic, ensuring high performance and responsiveness to requests from the front end. Selected intern's day-to-day responsibilities include: 1. Writing reusable, testable, and efficient code 2. Working on the implementation of low-latency, high-availability, and performant applications 3. Working on the integration of user-facing elements developed by front end developers with server-side logic 4. Handling the integration of data storage solutions such as MongoDB, Redis (key-value store), etc.

Who can apply:

Only those students or freshers can apply who:

- are available for full time (in-office) internship
- have relevant skills and interests
- can start the internship between 18th Mar'21 and 22nd Apr'21
- are available for duration of 3 months
- have already graduated or are currently in any year of study
- Females willing to start/restart their career may also apply

Number of internships/jobs available: 1

Categories: Web Development, Computer Science, Engineering

2) Full Stack Developer

OFFICE: GSA Tech World Private Limited - Bengaluru, Karnataka

₹2,50,000 a year - Full-time, Fresher - Temporarily remote

Responded to 51%-74% of applications in the past 30 days, typically within 12 days.

Urgently hiring

We are looking for a Full Stack developer responsible for the development and maintenance of websites across all the platforms. **Your primary focus will be the development of Frontend UI and their integration with back-end services.**

We expect the candidate to have well expertise in website UI designing and Photoshop. You will be working along-side other engineers and developers working on different layers of the infrastructure. Therefore, commitment to collaborative problem solving, sophisticated design, and creating quality products is essential.

Responsibilities

- Gathering functional requirements, developing technical specifications, and project & test planning
- Designing/developing web, software, mobile apps, prototypes, or proofs of concepts (POC's)
- Act in a technical leadership capacity: Mentoring junior engineers, new team members, and applying technical expertise to challenging programming and design problems
- Roughly 70-85% hands-on coding
- Resolve defects/bugs during QA testing, pre-production, production, and post-release patches
- Work cross-functionally with various Intuit teams: product management, QA/QE, various product lines, or business units to drive forward results
- Contribute to the design and architecture of the project
- Experience with Agile Development, SCRUM, or Extreme Programming methodologies

Skills

- We are looking for full stack engineers, knowing Laravel/Python on backend & HTML,CSS, Bootstrap & Angular J S on frontend.
- Designing with Photoshop & Illustrator Skills.
- Freshers & experience in developing web, software, or mobile applications
- Bachelor degree in computer science or equivalent work experience.
- Strong experience with any of the following Object-Oriented Languages (OOD)
- Experience with the entire Software Development Life Cycle (SDLC)
- Experience with web services (consuming or creating) with REST or SOAP
- Solid communication skills: Demonstrated ability to explain complex technical issues to both technical and non-technical audiences
- Strong understanding of the Software design/architecture process
- Experience with unit testing & Test-Driven Development (TDD).
