## **3) Python Development Internship**

**OFFICE:** iii Consulting Private Limited - Hyderabad, Telangana

**₹20,000 a month**

**FOR APPLY:** <https://internshala.com/internship/detail/python-development-internship-in-hyderabad-at-iii-consulting-private-limited1616581124>

### **About the company:**

Founded in 2015, with an aim to spearhead the growth of Indian startup ecosystem, iii Consulting Private Limited is a startup studio that provides capital and consulting support to Indian startups with a great idea to incubate and incorporate at a large scale. Currently, we have startups under our portfolio in the following areas: financial technology, food and beverages, health and fitness, event management, electronic recycling, and research and development.

### **About the internship/job:**

We are looking for a Python web developer for managing the interchange of data between the server and the users. Your primary focus will be the development of all server-side logic, ensuring high performance and responsiveness to requests from the front-end. You will also be responsible for integrating the front-end elements built by your co-workers into the application; therefore, a basic understanding of front-end technologies is necessary as well. Selected intern's day-to-day responsibilities include:

1. Writing reusable, testable, and efficient code
2. Designing and implementation low-latency, high-availability, and performant applications

### Who can apply:

Only those students or fresher's can apply who:

- are available for full time (in-office) internship
- have relevant skills and interests
- can start the internship between 24th Mar'21 and 28th Apr'21
- are available for duration of 6 months
- have already graduated or are currently in any year of study
- Females willing to start/restart their career may also apply

### Other requirements:

Fair knowledge of simulations, game architectures, graphics, networking, and user interfaces Expert in Python, with knowledge of at least Python/Django/Flask Knowledge of socket architecture or must have worked in such an environment Must be able to integrate multiple data sources and databases into one system Understanding of the threading limitations of Python, and multi-process architecture Knowledge of user authentication and authorization between multiple systems, servers, and environments Understanding of fundamental design principles behind a scalable application Familiarity with event-driven programming in Python Understanding of the differences between multiple delivery platforms, such as mobile vs desktop, and optimizing output to match the specific platform

**Number of internships/jobs available:** 2

**Categories:** Computer Science, Python/Django, Engineering, Web Development
