Job Details

Salesforce is looking for a strong front end developer to join Team Trailhead to focus on **myTrailhead**. myTrailhead is a modern, online Learning Experience Platform that enables organizations to leverage the power of Trailhead, to reinvent learning and enablement at their company - with their brand and content. myTrailhead transforms the corporate learning model and empowers organizations with tools needed to make learning bite-sized, customized, gamified and at the center of their business, creating a culture of continuous learning. **Learn** more how myTrailhead **connects** communities on our website here, may be even **earn** a couple badges on there and show it off on your profile!

As part of the Trailhead Engineering team, you will be working on web applications written in Node.js, Ruby on Rails and React deployed on Heroku. Day-to-day, you will develop new features with the engineering team and conduct code reviews, ensuring code is high quality, maintainable, well-factored, and functionality is well-supported with tests (from strict unit tests, to functional tests and integration tests and beyond). With our growth trajectory, test automation is the name of the game. You should have a passion for building elegant solutions while minimizing technical debt. Are you comfortable with pair programming and committed to contributing to the productivity of the team as a whole? Great, we should talk!

Trailhead is a distributed multi-cultural team. We use tools like GitHub and Slack to enable working collaboratively. We value transparency and honest feedback. This is a rare opportunity to build something that

positively impacts millions of users helping folks develop new skills and break into new careers.

Responsibilities

- Build features by writing maintainable code and know when to apply unit, functional, and integration tests.
- Work with your peers to design and document new and existing systems
- Provide support to our editorial and marketing teams to debug and solve production issues.
- Collaborate with other senior engineers, product management, and user experience experts to ensure that your features are of high quality and that they meet our customer's needs

Minimum Qualifications

- Several years experience with object oriented programming
- Professional experience with JavaScript, Node.js, React, and React Native
- Experience with relational datastores (PostgreSQL, MySQL) and an understanding of relational database design theory
- Strong technical design and abstraction skills
- You know what good, well-factored, code looks like
- You write technical designs/test plans and test content for your area and act as technical reviewer for others
- You are a strong communicator who is proactive and can explain complex technical concepts simply to a diverse set of audiences
- Consistent track record of delivering on commitments

Preferred Qualifications

- Experience with SLDS (Salesforce Lightning Design System)
- Working experience writing tests with cypress.io

- Professional experience deploying and managing applications on Heroku
- Experience with Continuous Integration and Deployment systems
- Professional experience building scalable web applications using Ruby on Rails
- An obsession for details

ABOUT SALESFORCE

Salesforce, the Customer Success Platform and world's #1 CRM, empowers companies to connect with their customers in a whole new way. The company was founded on three disruptive ideas: a new technology model in cloud computing, a pay-as-you-go business model, and a new integrated corporate philanthropy model. These founding principles have taken our company to great heights, including being named one of Forbes's "World's Most Innovative Company" five years in a row and one of Fortune's "100 Best Companies to Work For" eight years in a row. We are the fastest growing of the top 10 enterprise software companies, and this level of growth equals incredible opportunities to grow a career at Salesforce. Together, with our whole Ohana (Hawaiian for "family") made up of our employees, customers, partners and communities, we are working to improve the state of the world.

Accommodations - If you require assistance due to a disability applying for open positions please submit a request via this Accommodations Request Form.

Posting Statement

At Salesforce we believe that the business of business is to improve the state of our world. Each of us has a responsibility to drive Equality in our communities and workplaces. We are committed to creating a workforce that reflects society through inclusive programs and initiatives such as equal pay, employee resource groups, inclusive benefits, and more. Learn more about Equality at Salesforce and explore our benefits.

Salesforce.com and Salesforce.org are Equal Employment Opportunity and Affirmative Action Employers. Qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender perception or identity, national origin, age, marital status, protected veteran status, or disability status.

Salesforce.com and Salesforce.org do not accept unsolicited headhunter and agency resumes. Salesforce.com and Salesforce.org will not pay any third-party agency or company that does not have a signed agreement with Salesfore.com or Salesforce.org.

Salesforce welcomes all.

7) Principal Cloud Development Engineer
