Fresher

FOR APPLY:

https://boards.greenhouse.io/slicareers/jobs/2972643?gh_src=dd48b8e31us

Silverline employees are passionate about what they do. We are a diverse group of cloud technology professionals with the same goal: to make our clients' lives easier through technology and we have a good time while we are at it!

As a Salesforce Platinum Cloud Alliance Partner, Silverline combines Strategic Advisory, technical implementation, and ongoing Managed Services to enable organizations to achieve maximum value with the Salesforce platform. Silverline is the #1 Company to Work for among small and medium size companies in this year's annual Glassdoor Employees' Choice Awards, a list of the Best Places to Work in 2018. Come be a part of our team!

An exciting opportunity for a seasoned recruiter to lead our India recruitment activities and strategies. You will be working closely with our India HR Head and recruiters globally to secure top talent in the assigned region or geography.

This position will manage end to end recruitment and forge strong partnerships for various levels in the organization to support hiring across different levels including fresher, experienced technical professionals, support staff, and management roles. You will be responsible for managing accurate and concise records and reports concerning all phases of the recruitment process, including campus and university recruitment, and diversity hiring.

Your Role and Responsibilities

- Enhances multiple recruitment related relationships with hiring managers/team leads, internal and external candidates, vendors, campuses and other external sources in conducting recruiting activities.
- Partners and assists with the global talent acquisition group to create and implement comprehensive, innovative, cost-effective recruiting plans and processes.
- Develops and maintains accurate, comprehensive research and competitive intelligence as it relates to SIVERLINE CRM talent needs and sharing the knowledge with the broader talent sourcing team & HR teams.
- Identifies core competencies and technical competencies that drive success, conduct behavioural interviews using behavioural-based competency talent selection methods, as well as the *PI*
- Develop end to end recruitment strategies and set expectations around processes and timelines
- Has a deep understanding of technical and staff positions.
- Establishes strategic partnerships with managers and department leaders to understand position needs and act as an on-going candidate relationship manager.
- Provides value-added recruiting related advice to influence talent decisions for managers and department leaders.

- Manages mid-to-large scale global projects and initiatives within Global Talent Acquisition (University recruitment, marketing, compliance, diversity, etc.)
- Partners with cross-disciplinary teams to develop companywide hiring plans that includes volume, skills sets and geography.
- Selects, interviews and recommends candidate pools to hiring managers - based on measurable agreed upon service level agreement.
- Prepares, negotiates and extends offers to candidates.
- Ensures all candidate data is entered in the recruitment system in accordance to the policy.
- Provides accurate and timely information to staff regarding personnel policies and HR services, programs, and activities related to recruitment (posting guidelines, referral program, interim guidelines, etc.)

We expect you to have:

- Bachelor's degree or equivalent required.
- 5-8 years of related TA Partner experience in a Technical Corporate environment required.
- Excellent knowledge of full lifecycle recruiting components including, but not limited to talent sourcing, assessing, scheduling, applicant tracking, closing offer processes and relationship management.
- Ability to manage Recruitment Vendor Relations to create effective supporting ecosystem.
- Ability to launch and sustain talent pipelining programs through capturing key sourcing intelligence, effectively converting passive candidates and utilizing diverse sourcing channels.
- Exposure to Campus recruitment by engaging with different Technical/Finishing Schools.
- Ability to use e-recruitment and web technologies to support Talent Selection including, but not limited to applicant tracking systems, CRM technologies, social and digital media.

OFFICE: Digitera Technologies - Bengaluru, Karnataka

₹2,00,000 - ₹4,00,000 a year - Full-time, Fresher - Temporarily remote

Urgently hiring

Job Description

Site Reliability Engineer

Introduction

Digitera Technologies is a digital technology company based in Bangalore, India with vast experience in developing solutions for the enterprises using latest digital technologies.

Digitera is setting up APAC time zone Site Reliability Engineering team (SRE team) for a leading creator of the world's most widely-used real-time 3D (RT3D) development platform, providing content creators around the world with the tools they need to build rich, interactive 2D, 3D, VR and AR experiences. In fact, apps made with our client reach 2.7 billion devices worldwide and were installed more than 24 billion times in the last 12 months.

The global engineering team keeps at the forefront of technology and — working alongside partners like Magic Leap, Google, Facebook, Oculus and Microsoft — ensures optimized support for the latest technology and platforms. Our Client is powering the real-time revolution, expanding beyond games and breaking into other industries including automotive, film, architecture, engineering, construction and more.

Job Description – Site Reliability Engineer & Lead

The world's leading game engine is looking for brilliant engineers for our Site Reliability Engineering organization. Customers don't like service disruptions, and neither do we. Our mission is to manage production incidents...with technology. We build automation to measure, detect, and prevent production issues. When needed, we use experience and communication to work with other teams to resolve issues manually, and then make sure it doesn't happen again!

There are SRE teams in three regions to offer 24x7 support - EMEA, Asia and Americas. We cover 8 hour shifts across 5 days a week, which includes coverage over the weekend and holidays.

Responsibilities

- Incident management and RCA reviews
- Develop SRE related automation and tooling
- Work with development teams to enable them to achieve high level of service resiliency
- Participate in defining Site Reliability policy, process, technology and best practices
- Advocate for infrastructure improvements and best practices across the organization
- Develop services for automatically detecting and eliminating service disruption
- Debug and troubleshoot production systems

Requirements

- Deep knowledge of infrastructure core components: Linux, storage, system and/or networking
- Proficiency with modern languages like **Golang and Python**
- Knowledge of infrastructure-as-code tools (eg: Terraform)
- Experience with cloud environments, **Google Cloud GCP) ideally**
- Experience with container technology, specifically **Docker and Kubernetes**
- Experience with Linux and standard tooling (**Bash, Git, etc**)
- Experience debugging and troubleshooting systems*
- Strong verbal and written communication skills*

As Site Reliability Engineers we believe strongly in the following and require the candidates to have same mind-set:

- Our customers demand healthy services
- Everything should be measurable
- Everything should be automated
- Alerts must be actionable
- Processes must be sensible, valuable, & repeatable
- Don't reinvent the wheel

Job Types: Full-time, Contract

** Python Developers with Linux background is desirable ****

Resume to be sent via indeed or whatsapp message on +91-99000 83952 for details.
