

1) Salesforce Developer

OFFICE: Fission Labs - Hyderabad, Telangana

Like to shake things up? We do. Fission Labs is a product development, product engineering and Services Company that builds products from the scratch. We manage the entire product development life cycle for our clients, right from defining a problem statement to delivery. We leverage cutting edge open source technologies to manage end to end product development.

Who you are?

You are curious, persistent, logical and with a growth mind set – a true techie at heart. You enjoy living by the code of your craft and developing elegant solutions for complex problems. If this sounds like you, please join our team!

Location: Remote for now. However, expected to relocate to Hyderabad after a travel safe environment gets established.

What's special about us?

One of the earliest adopters of AWS in India

Start-up spirit (Good ten plus years, yet we maintain it)

Technical meet-ups (We are known for hosting them in the town)

Last organized was:

<https://www.meetup.com/awsughyd/events/268054159/>

Flat hierarchy

Benefit package: Health insurance, gratuity benefits, Flexible benefits

Opportunity to share your ideas on international platforms

Opportunity to work on technical challenges that may impact across geographies

Responsibilities:

- Participate in application design, configuration, customization, and deployment
- Design and implement technical solutions to satisfy functional and non-functional requirements
- Work closely with various technology teams. Most often we collaborate with Test-automation, DevOps, Integration
- Integrate multiple systems with Salesforce, including internal proprietary and third-party applications
- Provide technical assistance and end user troubleshooting

Technical Attributes:

- Proven experience across various Salesforce Clouds (preferably Sales & Service)
- Real passion about Salesforce and desire to help customers leverage Salesforce systems
- Experience in Salesforce APEX, Lightning, SOQL, LWC and APIs
- Good understanding of Salesforce communities (Customer communities, Employee communities, Partner communities)
- Hands on experience defining, implementing data sharing model (custom sharing and sharing calculations)
- Good understanding and hands on in concept: asynchronous apex (Queueable Apex, Scheduled Apex, Batch Apex, Future Methods)
- Agile development experience
- Good analytical and problem-solving skills
- Clear, concise communication skills and good command of written and spoken English

- Experience in building complex, scalable, and high-performance software systems that have been successfully delivered to customers.

Amazon's Employee Services Technology (ES Tech) is looking for a Salesforce Lightning Developer to help deliver customized Salesforce.com (SFDC) solutions that we are building for our Disability and Leave Services (DLS) business customers. DLS is a program to deliver leave of absence, disability and accommodation services to Amazon employees globally. We are building a brand new team, to enable employee self-sufficiency by providing simple, intuitive self-service tools across devices using communities, lightning, and other Salesforce next gen technologies. Driven by innovation, our mission is to invent and simplify the customer experiences. We will implement the overall self-service strategy and user experience for our employees and partners by integrating it with other Amazon cross systems and platforms like telephony (AWS Connect), content management system (CMS), and analytics ensuring a consistent global experience.

We are looking for a talented and experienced Salesforce Lightning developer to dive deep, develop and automate initiatives for our rapidly growing services. As a Salesforce Lightning Developer, you will be a core member of the development team supporting all our business systems and provide scalable and maintainable solutions on the Salesforce.com platform.

This includes development, configuration, administration of Salesforce.com and integration with other Amazon systems.

Responsibilities:

- Building applications using Apex and Lightning.
- Working with Lightning Framework, Lightning components, Lightning events and Salesforce Lightning Design system.
- Working in agile development methodologies with Service Cloud implementation.
- Perform technical analysis, design, development, implementation of applications with necessary customization.
- Support cross systems and related integration's across native Salesforce eco system.
- Build solution on Salesforce.com platform, including development in Force.com, Visualforce, Lightning, Apex, Web Services and API's.
- Work with a cross-functional Scrum team to maintain and enhance Salesforce Service Cloud applications in iterative release cycles.
- Troubleshoot and fix defects for planned releases and production issues.
- Research and find opportunities to utilize SFDC best practices, guidelines to improve system productivity, scaling and monitoring.
- Understanding of HR business processes.
- Experience working with technical and business stakeholders from global cross-functional teams.
- Experience working in an Agile/Scrum environment.
- Certified Salesforce Platform Developer II (PDII) or equivalent experience.
- Experience in writing high quality technical documents.
- Ability to work in a fast-paced and changing environment.

Amazon is committed to a diverse and inclusive workplace. Amazon is an equal opportunity employer and does not discriminate on the basis of race, national origin, gender, gender identity, sexual orientation, protected veteran status, disability, age, or other legally protected status.
