

1) Application Developer: Mulesoft

OFFICE: IBM - Hyderabad, Telangana

FOR APPLY: https://careers.ibm.com/job/12816659/application-developer-mulesoft-hyderabad-in/?codes=JB_Indeed&codes=1-INDEED

Introduction

As an Application Developer, you will lead IBM into the future by translating system requirements into the design and development of customized systems in an agile environment. The success of IBM is in your hands as you transform vital business needs into code and drive innovation. Your work will power IBM and its clients globally, collaborating and integrating code into enterprise systems. You will have access to the latest education, tools and technology, and a limitless career path with the world's technology leader. Come to IBM and make a global impact!

Your Role and Responsibilities

- You will be involved in integration of projects using IBM WebSphere Integrator Message Broker tool kit.
- Ownership of deploying integration components in development environments.
- Client interaction and ability to lead and guide teams on developing solutions that fully integrate and collaborate with existing IT systems to perform an automated business function.
- You will design and develop maps, message flows and configure/develop adaptors.
- Participates in all design sessions and provides technical leadership (including technical decisions, technology recommendations, defining standards, leading POCs, and mentoring developers).
- Define the strategy and overall vision for solutions.
- Provide complete solution designs that consider cost, performance, scalability, reusability, and extensibility.
- Document application requirements, technical specifications, use-cases, workflow processes.
- Prepare Mapping Specification and Integration Design document.

- You will work with Business and Application teams to elaborate both Functional and non-functional requirement.
- Mentor and develop skills of other members of the team. Collaborate with other development and integration team members to ensure Service-Oriented Architecture (SOA) Integration technologies are implemented and maintained.

Required Technical and Professional Expertise

- 4+ Years hands on experience on doing Analysis, Integration design and document Interface requirement.
- 2+ Years of experience on ITX (IBM Transformation Extender) map development.
- 2+ Years experience on DML (Insert, Update and Select)
- Experience working with integration solutions as IT Architect
- Extensive knowledge about appointed integration infrastructure components
- Detailed knowledge of IBM MQ and IBM Websphere Message Broker 8 or IIB
- Knowledge in Integration Development Routine
- Knowledge in governance regarding integration solutions
- Demonstrable Experience with creating, performance tuning, and troubleshooting message flows

Preferred Technical and Professional Expertise

- Experienced on IBM Integration Bus (preferably worked on at least 2 projects and have developed 5 flows)
- Experience in WebSphere SOA integration Middleware would be an added advantage.

About Business UnitIBM Services is a team of business, strategy and technology consultants that design, build, and run foundational systems and services that is the backbone of the world's economy. IBM Services partners with the world's leading companies in over 170 countries to build smarter businesses by reimagining and reinventing through technology, with its outcome-focused methodologies, industry-leading portfolio and world class research and operations expertise leading to results-driven innovation and enduring excellence.

Your Life @ IBMWhat matters to you when you're looking for your next career challenge?

Maybe you want to get involved in work that really changes the world? What about somewhere with incredible and diverse career and development opportunities – where you can truly discover your passion? Are you looking for a culture of openness, collaboration and trust – where everyone has a voice? What about all of these? If so, then IBM could be your next career challenge. Join us, not to do something better, but to attempt things you never thought possible.

Impact. Inclusion. Infinite Experiences. Do your best work ever.

About IBMIBM's greatest invention is the IBMer. We believe that progress is made through progressive thinking, progressive leadership, progressive policy and progressive action. IBMers believe that the application of intelligence, reason and science can improve business, society and the human condition. Restlessly reinventing since 1911, we are the largest technology and consulting employer in the world, with more than 380,000 IBMers serving clients in 170 countries.

Location StatementFor additional information about location requirements, please discuss with the recruiter following submission of your application.

Being You @ IBMIBM is committed to creating a diverse environment and is proud to be an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, age, veteran status, or other characteristics. IBM is also committed to compliance with all fair employment practices regarding citizenship and immigration status.

2) PMTS-Distributed System Engineer-Security Engineering

Job Details

Job Title:

Principal Engineer/Architect , Infrastructure Security (Software Security Analysis Platform)

Job Category:

Technology - Infrastructure Engineering

Location:

Hyderabad

Salesforce is world's #1 CRM business and Trust is our #1 value. We commit to Trust by upholding the highest engineering and security standards for the code running the Salesforce platform, including security analysis of code and packages.

The Security Engineering team is looking for a hands-on Principal Engineer/Architect to lead a set of highly scalable and available cloud platform-as-a-service (PaaS) for performing automated code and package security analysis. This platform integrates with state-of-the-art technologies for static/dynamic application analysis (SAST/DAST), as well as open source software scanners. You will lead a critical piece of our release pipelines while also helping engineers identify security flaws in their code natively build AWS host services. Your systems support both internal as well as external software packages that run in the Salesforce ecosystem, providing significant outreach and business impact.

This is a great opportunity for ambitious and technically strong engineers who want to make an impact in both distributed systems development and application security vulnerabilities, while operating on a large scale cloud platform.

The position requires excellent technical skills and outstanding analytical and influencing skills paired with great business insight. It is a cross-functional role that requires alignment building and communication within a large engineering ecosystem.

Responsibilities/Duties

- **Drive (ideate, document, socialize, build the actional plan and oversee the execution of) strategic technology initiatives, working with Product Managers, other Architects, Engineers, SME's and the broader Salesforce organization. (You have experience having already done this)**
- **Analyzes and provides feedback on product strategy. Provides input into long-range product requirements, best practices, and operational guidelines, with focus on continuous improvement of platform reliability and serviceability**
- **Drives research, case studies, and prototypes on leading edge technologies and how they can be leveraged**
- **Drive design and implementation of innovative distributed software platforms for continuous assessment of security posture of the code and third-party packages used by Salesforce engineers**
- **Lead development teams in a full-service ownership model following Agile methodologies**
- **Manage devops activities for owned services in a 24/7 runtime environment, including driving investigations to determine root cause and implement solutions.**
- **Collaborate with other engineering teams to solve security problems with minimal disruption to other business functions.**
- **Hire, train and assess the performance of direct reports according to corporate policies and procedures.**
- **Assist in the growth of employees through coaching, training and career development activities.**
- **Interact with industry experts, vendors, partners, internal staff and auditors**

- Work effectively as part of a geographically distributed team
- Occasional travel is required (domestic and international)
- Work in a consultative fashion to improve communication, collaboration and alignment amongst teams inside and outside of the organization
- Ensures that we are continuously raising our standard of engineering excellence

Required Skills/Experience

- Industry experience. 15+ years of experience in software development, including:
 - 5+ years experience in SaaS, PaaS or IaaS software development
 - 5+ years experience in a high-availability 24/7 environment (cloud platforms are a plus)
- Education. M.Sc/M.Eng in Computer Science/Engineering or B.A/B.Sc. in same disciplines with equivalent years of experience
- Platform development. Proven track of designing, coding and delivering large-scale PaaS or IaaS systems, especially on public cloud substrates (AWS/GCP)
- Programming. Proficiency in object-oriented and multi-threaded programming to develop hands-on and support(code-reviews and guiding) engineers in more than one of the following languages: Golang, Java, C++, Python
- Security. Strong knowledge in security fundamentals: authentication/authorization frameworks (e.g., SSO, SAML, Oauth), secure transport (e.g., SSL, TLS), identity management (e.g., certificates, PKI), vulnerability management
- Hands-on experience using or managing SAST/DAST tools (e.g, CheckMarx, Veracode, HP Fortify, Coverity, IBM AppScan, Parasoft, Klocwork, CodeSonar, Burp)

- Experience scanning open source software (OSS) and understanding flaw reports using component integration tools (e.g., Sonatype's Nexus, Veracode, Black Duck)
- Hands-on experience with container technologies (e.g., Docker, Kubernetes)
- DevOps mindset and strong ownership over owned code (test, monitor, deploy, maintain)
- Team. Ability to lead, motivate and grow teams of developers in a challenging, dynamic and global environment
- Agile. Prior experience managing teams using agile methodologies (Scrum, Kanban)
- Communication. Excellent oral and written communication skills in English. Proven ability to run meetings and make presentations to senior leaders and teams alike.

Desired Skills/Experience

- Distributed systems. Expertise in designing, implementing and operated distributed systems architectures and concepts, including several of the following:
 - High-performance, high-availability (99.999%) and self-recoverable systems
 - Control, orchestration and automation platforms leveraging containers or VMs
 - Storage solutions, in particular MySQL (e.g., Cassandra, MongoDB, Hadoop, Redis, Zookeeper)
 - Consensus and consistency frameworks (e.g., Paxos, Raft, eventual consistency)
 - Data-processing systems (e.g., Lambda architecture, Kafka, RabbitMQ, ELK)
 - RPC frameworks (e.g., Protobuf/gRPC, Thrift, Bond)
- Proven track of building large-scale PaaS or IaaS systems, especially for public cloud providers (e.g., AWS, Azure, GCP)

- **Operating systems. Development and software management on Linux systems (e.g., CentOS, RHEL)**
- **Software design. Demonstrated expertise in applying systems patterns (e.g., Client-server, N-tier, Master/Slave, MVC) and API constructions (e.g., Swagger, OpenAPI)**
- **Full-software ownership from idea to running in production: design, code, writing unit tests, performing integration tests, deploying to production, supporting the system in the production environments**
- **Experience using or operating continuous integration, continuous delivery and deployment automation (e.g., Jenkins, CloudBees, Bamboo, TeamCity)**
- **Familiarity with source code management and version control systems (git, perforce)**
- **Experience with code signing and build management tools (make, SCons, ant, maven).**
- **Familiarity with Salesforce platform can be a plus**

4) DevOps Engineer

OFFICE: Metamorfs Infotech Pvt Ltd - Hyderabad, Telangana
Temporarily remote

Devops Engineer

Locaton : Hyderabad / Chennai / Coimbatore

Experience: 4-6 years

Employment Type: Permanent

Project Overview:

A DevOps Engineer will work with IT developers to facilitate better coordination among operations, development, and testing functions by automating and streamlining the integration and deployment processes.

DevOps aims at coupling a tighter alignment between IT operations and businesses.

Job Functions & Responsibilities:

- * Responsible for supporting the users of the infrastructure they develop, and the first line of defense in protecting the cloud against hackers and viruses.
- * Works with developers and the IT staff to oversee the code releases.
- * Manage source code in centralized configuration management system.
- * Triage networking issues to determine if and when the Networking group needs to be involved.
- * Implement best practices and tools, related to DevOps
- * Develop software documentation to verify compliance with software CM plans and procedures.
- * Implement deployment processes that entail packaging releases, pushing releases and executing installs.
- * Develop and maintain Continuous Integration processes, tools and execution; includes test frameworks, code quality analysis, etc.

Must have Skills & Experience:

- * BS or MS in related industry/field or equivalent experience (Computer Science, Computer Engineering, Information Systems)
- * 5+ years of progressive DevOps engineering experience, diagnosing/correcting issues, managing security vulnerabilities, and maintaining compliance with industry security standards under minimal direction.
- * Has worked closely with full Product Teams (Product Managers, Tech Leads, Engineering Manager, Security and Operations roles) to deliver an experience to customers
- * Strong interpersonal communication and diplomacy skills.
- * Hands on experience with CI/CD practices and tools Jenkins, Maven, Azure DevOps (Team Foundation Server, GIT), MS Build
- * Experience in writing Unix Shell scripting, Windows PowerShell
- * Experience in working with SQL Server, MongoDB
- * Experience in working with Docker, Kubernetes containers
- * Experience in working with Linux (Ubuntu) and Windows OS's
- * Must be familiar with Servlet containers like Tomcat, Jetty, JBoss

Job Type: Full-time

Schedule:

- Morning shift

Experience:

- total work: 4 years (Preferred)

Work Remotely:

- Temporarily due to COVID-19

Speak with the employer

7) Azure Cloud Specialist

OFFICE: Bosch Group - Hyderabad, Telangana

FOR APPLY: <https://jobs.smartrecruiters.com/BoschGroup/743999745156283-azure-cloud-specialist>

Company Description

Robert Bosch Engineering and Business Solutions Private Limited (RBEI), is a 100% owned subsidiary of Robert Bosch GmbH, one of the world's leading global supplier of technology and services, offering end to end engineering, IT and Business solutions.

With over 18000 associates, RBEI is the largest software development center of Bosch outside Germany, indicating we are the Technology Powerhouse of Bosch in India. We have a global footprint with presence in US, Europe and the Asia Pacific region. RBEI is ISO 9001:2008 certified (2012), appraised at CMMI-L5 as per version 1.3 (2011), ASPICE - level3 based on version 2.5 and ISO 15504- 5 and 7, and also ISO 27001 with seven state-of-the-art facilities spread across Bangalore and Coimbatore in India, Ho Chi Minh City in Vietnam and Guadalajara in Mexico, ISO/IEC 20000-1:2011 certified (2014).

We nurture, build and sustain enduring customer relationships to enable direct operational and strategic benefits to our customers. We make it happen through qualified, motivated and flexible professional associates, who uphold the heritage and values of Bosch - time-tested over 125 years of a successful journey; a journey marked by quality, reliability and innovation of service to enhance the interest of our customers and the community we live in.

We provide solutions for businesses in primarily three areas:

- Engineering Services
- IT services
- Business services

Our focal industries:

- Automotive industry
- Industrial Technology
- Consumer Goods and Building Technology.

Our role

“We see RBEI as helping us to achieve the technological lead we need to have in order to prevail in increasingly competitive world markets..... RBEI is about ensuring product excellence under conditions that allow us to maintain our global competitiveness” – Mr. Franz Fehrenbach, Chairman of the Board of Management, Robert Bosch GmbH.

Job Description

Cloud Development Specialist

We are looking out for some great minds who could join our awesome Cloud team and be part of the **#CoolSoftwareCompany** to build the next gen applications for our global customers.

If you are a technology enthusiast and have passion to use cloud technology stack to solve complex problems then look no further.

Key Responsibilities

- Understand business requirements and technical limitations and architect solution accordingly
- Responsible for developing application and services for and using Azure Cloud Services
- Responsible for taking Technology decisions for the project
- Participating in the complete development life cycle
- Coded Unit testing achieving respective unit test coverage

Key Requirements

- Degree in Computer Science / Electronics / Information Technology
- Work experience of 5 to 8 years in the relevant technologies
- Strong technical knowledge of C#, .NET Core, Azure DevOps
- Experience in container-based development
- Experience in messaging Queue like Azure Service bus, Kafka or RabbitMQ
- Experience in Azure Services like Azure Logic Apps, Azure Functions etc.
- Experience with Micro-services architecture
- Experience in deploying Micro-services in Azure Service fabric and AKS
- Hands-on experience in Databases like MS SQL and No SQL Databases

- Good to have experience in any Time Series Databases.
- Knowledge on using IoT Services provided by Microsoft Azure (Ex: IoT Hub, IoT Edge)
- Excellent verbal communication skills.
- Good problem solving skills.

Qualifications

BE/MCA

8) Java Full stack Developer

OFFICE: JPMorgan Chase Bank, N.A. - Hyderabad, Telangana
