Job Details

IAM- Identity DevOps Engineer

Founded in 1999, Salesforce is the global leader in Customer Relationship Management (CRM). Companies of every size and industry are using Salesforce to transform their businesses, across sales, service, marketing, commerce, and more by connecting with customers in a whole new way. We harness technologies that can revolutionize companies, careers, and, hopefully, our world.

Salesforce is built on a set of four core values: Trust, Customer Success, Innovation, and Equality. By making technology more accessible, we're helping create a future with greater opportunity and equality for all. This has taken our company to great heights, including being ranked by Fortune as one of the "Most Admired Companies in the World" and one of the "100 Best Companies to Work For" eleven years in a row, and named "Innovator of the Decade" and one of the "World's Most Innovative Companies" eight years in a row by Forbes.

There are those who choose to work with the best and brightest. And then, there are those who want to do more than just a job. They are the ones improving lives, not only their careers. Having an impact now instead of later. Doing something that's so much bigger than

themselves, an industry, and their company.

We believe everyone can be a Trailblazer. Join Salesforce and discover a future of new opportunities.

Our Security Software Engineering team builds and operates highly scalable, fault-tolerant, distributed systems to deliver cloud-scale security software services. We provide the fundamental building blocks to improve and preserve customer trust in Salesforce's products across multiple public cloud substrates and our own network infrastructure.

One of the key investment is in the area of Identity and Access, where we design and implement consistent and scalable identity and access services for all of Salesforce, integrating our IT network, public cloud infrastructure and our own data centers, and empowering all our engineers to operate these environments in secure manner. Identity is also an area where there are large regulatory, compliance, security and auditing requirements to ensure we have complete visibility of who has access to what.

Role Description:

Salesforce Security IAM (Identity & Access Management) team is currently seeking an Engineer who will partner with other systems engineers, developers, and technical program managers to architect. He will integrate, deploy, operate and manage end-to-end IAM solutions across multiple Public Cloud Substrates within Salesforce. As a member of the IAM team, you will be responsible for designing, building, and maintaining IAM systems. You will recommend automation, coordinate optimizations and promote adoption across the infrastructure, at cloud scale. This position helps drive continuous improvement with a focus on process, controls, scalability, and maturity.

Responsibilities:

- Develop secure automation and tooling, according to architectural guidelines, throughout the Identity platform. Focusing to improve our customer support workflow, build automated response tools so

that internal IAM customer queries are efficiently routed to the correct team.

- Develop, promote security standards and best practices via cross-functional partnership with engineering teams throughout Salesforce. Uplift security platforms and practices across environments.
- Identify gaps within existing processes and develop solutions to help protect systems and security infrastructure. Review and improve operational processes, DevOps, deployment checklists, and QA.
- Generate technical specifications/documentation. Drive innovation & co-ordinate automation initiatives across teams.
- Work with customers and support to resolve bugs and support issues. Commitment and emphasis on operational excellence.
- Understand the customer/business requirements and translate them to elegant/flexible/easy-to-use platform capabilities.
- Develop telemetry and metrics to drive operational excellence, report on progress and adoption
- Be a multiplier. Have a passion for working together as a team and ensuring team members' succeed. Lead and mentor junior members of the team.
- There may be a requirement to provide on-call support for this role.

Required Skills/Experience:

- 6+ years software engineering experience
- Knowledge of Linux OS
- Masters / Bachelors degree required in Computer Science, Software Engineering, or equivalent experience
- Experience in Apex/Lightning and good understanding of our Salesforce platform (if possible certification Dev/App-Builder DEX 403) or previous Salesforce platform development
- Working knowledge on Java, Go, Python, C/C++
- Experience managing code through source control, CI/CD pipelines, Git/Github
- Familiar with public cloud services such as Amazon AWS, Google Cloud Platform and/or Microsoft Azure
- Experience at Scrum or other Agile development methodologies, attention to code quality, delivering secure code
- Experience in tooling and integration technology using AI (e.g. chat bots, slack bots)

- Knowledge of IAM services or technologies (e.g. 2FA, authentication, authorization, federation)
- Experience deploying and operating infrastructure and services at scale
- Experience with Infrastructure as Code/config management tools: Eg. Puppet, Terraform, CloudFormation or similar cloud-based production workload management tools
- You haven't just used, but have built and operated the distributed platforms that define cloud-scale infrastructure

Desired Skills/Experience:

- Working experience with Commercial and Open Source (OpenLDAP, OpenDJ, etc.) enterprise IAM platforms
- Understanding of AuthN/AuthZ architectures and specifications (e.g., Kerberos, LDAP, OAuth)
- Knowledge of Docker, Kubernetes, Codecommit in AWS & Spinnaker would be beneficial
- Experience with service offerings from major cloud providers (AWS/GCP/Azure), and on-premise/cloud hybrid architectures
- Industry recognized certifications (e.g., RedHat, CISSP, Windows)
- Knowledge of networking protocols

Accommodations

If you require assistance due to a disability applying for open positions please submit a request via this Accommodations Request Form.

Posting Statement

At Salesforce we believe that the business of business is to improve the state of our world. Each of us has a responsibility to drive Equality in our communities and workplaces. We are committed to creating a workforce that reflects society through inclusive programs and initiatives such as equal pay, employee resource groups, inclusive benefits, and more. Learn more about Equality at Salesforce and explore our benefits.

Our Company

Hitachi Vantara is part of the Global Hitachi family. We balance innovation with an open, friendly culture and the backing of a long-established parent company, known for its ethical reputation. We guide customers from what's now to what's next by unlocking the value of their data and applications to solve their digital challenges, achieving outcomes that benefit both business and society.

Our people are our biggest asset, they drive our innovation advantage and we strive to offer a flexible and collaborative workplace where they can thrive. Diversity of thought is welcomed and our employee base is represented by several active Employee Resource Group communities. We offer industry leading benefits packages (flexible working, generous pension and private healthcare) and promote a creative and inclusive culture. If driving real change gives you a sense of pride and you are passionate about powering social good, we'd love to hear from you.

Our Values

Research tells us that some applicants, especially those from underrepresented groups, can be put off from applying for roles if they need flexibility or feel they don't meet all of the set criteria. We strive to create an inclusive environment for all and are open to considering home working, compressed/flexible hours and part-time arrangements.

Get in touch with us to explore how we might be able to accommodate your specific needs.

We are proud to say we are an equal opportunity employer and welcome all applicants for employment without attention to race, colour, religion, sex, sexual orientation, gender identity, national origin, veteran or disability status. With Japanese roots going back over 100 years, our culture is founded on the values of our parent company expressed as the Hitachi Spirit:

Wa – Harmony, Trust, Respect

Makoto – Sincerity, Fairness, Honesty, Integrity

Kaitakusha-Seishin – Pioneering Spirit, Challenge
